Frankfurt am Main, Germany

SUMMARY

Master's student in High Integrity Systems at Frankfurt University of Applied Sciences with 5.5 years of professional IT experience in software development. Experienced in frontend and backend development, including React-based web applications, Angular development, and migrating existing applications to React. Skilled in building reusable UI components, integrating REST APIs, and developing backend services using Python. Familiar with SQL, Docker, cloud deployments, Git, CI/CD, automated testing, and troubleshooting in Agile environments.

EDUCATION

Master High Integrity Systems
Frankfurt University of Applied Sciences
10/2026 – Present | Frankfurt, Germany

MASTER OF COMPUTER APPLICATIONS
Karpagam college of Engineering(Anna University)
08/2011 – 04/2014 | Coimbatore, India

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
V.L.B Janakiammal college of Arts and science
06/2008 – 04/2011 | Coimbatore, India

PROFESSIONAL EXPERIENCE

ALPHIND SOFTWARE SOLUTIONS – Chennai, India
SOFTWARE DEVELOPER
08/2021 – 04/2022

- Developed and maintained web application components using Angular, React, JavaScript, TypeScript, HTML5, and CSS3.
- Contributed to migrating legacy application components from AngularJS to Angular, improving code maintainability and reusability.
- Developed reusable UI components and implemented application features using Angular and React, following Agile development practices.
- Performed debugging, integration testing, and issue resolution to improve application reliability and performance.
- Investigated production issues, identified root causes, and implemented bug fixes for business-critical applications.
- Collaborated with business stakeholders and cross-functional technical teams to deliver application enhancements.
- Supported application maintenance, deployments, and continuous improvement activities.

TOVERTO SOLUTIONS PRIVATE LIMITED - Coimbatore,India
SOFTWARE ENGINEER
02/2021 – 07/2021

- Contributed to the migration of the Landry's Select Club application from Xamarin to Ionic framework.
- Developed reusable and maintainable application components following clean code principles and coding standards.
- Participated in debugging, code reviews, and testing activities to ensure application quality and stability.
- Collaborated with cross-functional teams in agile development environments to support feature delivery and application improvements.

NOUS INFOSYSTEMS - Coimbatore,India
EXECUTIVE BUSINESS DEVELOPMENT
08/2016 – 12/2020

- Collaborated with technical teams and clients to support digitaltransformation and software solution initiatives across multiple domains.
- Gained strong understanding of software development life cycles, webtechnologies, and client requirements through close coordination withengineering teams.
- Worked with cross-functional stakeholders to align business needs withtechnical solutions in agile project environments.
- Built strong communication and problem-solving skills while coordinatingwith enterprise clients and technical teams.

PROJECTS

Enterprise Workflow Management Platform | Full Stack SaaS Project
Technologies: React.js, JavaScript (ES6+), JSX, React Hooks, React Router, Context API, Axios, REST APIs, HTML5, CSS3, Git
06/2026 – 07/2026

Live Demo:
https://enterprise-workflow-management-syst.vercel.app/
Backend API:

SKILLS

React.js | JavaScript (ES6+) | TypeScript | React Hooks | JSX

React Router | Context API | HTML5 | CSS3 | Tailwind CSS

REST APIs | Axios | Frontend Development | Responsive UI

Python | Backend Development | Microservices

PostgreSQL | MySQL | Database Design

Docker | CI/CD | GitHub Actions

Cloud Platforms: Azure | Render | Vercel

JWT Authentication | Authorization | API Security

Git | Agile | Scrum | JIRA

Unit Testing | Debugging | Troubleshooting

GitHub Copilot | Cursor | Claude

CERTIFICATES

- Google Cloud - Generative AI Leader Certification - 12/10/2026
- IBM - Back-end Application Development with Node.js and Express - 15/08/2025
- IBM - Developing Front End Apps with React - 29/07/2025
- AZ-900 - Microsoft Azure Fundamentals - 24/11/2023
- Goethe-Zertifikat B1(currently preparing for B2 certification) - 06/01/2026

English

German

AWARDS

Emerging Star Award
Alphind Software Solutions
01/2022

https://flowcore-api.onrender.com
Description:
Developed and enhanced web application features using React, focusing on reusable UI components, API integration, and responsive user interfaces.
Responsibilities:
- Built reusable React components using functional components and React Hooks.
- Integrated REST APIs using Axios to retrieve and manage application data.
- Implemented component state management and client-side navigation.
- Developed responsive user interfaces using HTML5, CSS3, and React.
- Debugged application issues and improved component maintainability.
- Used Git for version control and collaborated on application development and deployment.

Employee Management System | Full Stack Project
Technologies: React.js, JavaScript, React Hooks, Axios, Java, Spring Boot, REST APIs, PostgreSQL, JWT, Hibernate, Docker, Git, Render, Vercel, Neon PostgreSQL
08/2026 – 09/2026
Live Demo:
https://employee-management-frontend-new.vercel.app
Backend API:
https://employee-management-system-java-eda7.onrender.com/employees
Responsibilities:
- Developed a full-stack Employee Management System using React.js, Spring Boot, and PostgreSQL.
- Built reusable React components and responsive user interfaces for employee management and dashboard functionality.
- Integrated RESTful APIs using Axios to support employee creation, retrieval, updating, and deletion (CRUD).
- Implemented JWT-based authentication and OTP-based email verification to support secure user access.
- Developed an interactive dashboard featuring analytics charts and dark mode.
- Integrated the React frontend with backend services and PostgreSQL database operations.
- Containerized the backend using Docker and deployed the frontend and backend using Vercel and Render, with Neon PostgreSQL for database hosting.
- Configured GitHub-based deployment workflows to support automated builds and deployments.

StatusLead
Technologies: React.js, JavaScript (ES6+), TypeScript, JSX, React Hooks, React Router, Context API, HTML5, CSS3, Bootstrap, Axios, REST APIs, Azure, Git, npm
02/2021 – 07/2021
Description:
Enterprise web-based lead management and business automation platform supporting workflow tracking, customer engagement, and operational processes.

Responsibilities:

- Developed and maintained reusable web application components using React, JavaScript, and TypeScript.
- Contributed to migrating existing application components to React to improve maintainability and reusability.
- Integrated RESTful APIs to support application workflows and system integration.
- Supported application deployment in Azure-based environments.
- Performed debugging, testing, and issue resolution to improve application reliability and performance.
- Collaborated with cross-functional teams in Agile environments to deliver features and support continuous improvement.

Sandhills Center Management Care System
AngularJS, Angular 2+, TypeScript, RxJS, Angular Material, HTML5, SCSS, JavaScript
08/2021 – 04/2022
Description:
Large-scale enterprise healthcare management application supporting claims processing, workflow management, and business-critical operations across 600+ screens.
Responsibilities:

- Contributed to the migration and modernization of a large-scale healthcare application with 600+ screens from AngularJS to Angular using TypeScript and RxJS.
- Developed responsive, reusable Angular components to improve code maintainability and support application modernization.
- Refactored existing modules and supported the migration of legacy functionality to Angular's component-based architecture.
- Performed testing, debugging, and code refactoring to resolve issues and maintain application stability.
- Collaborated with team members to integrate migrated modules and support ongoing application enhancements.
